

98c Grant Proposal
Plan to Address Learning Loss
Island City Academy

Programming:

Island City Academy plans to use the 98c Learning Loss Grant to address learning loss by using intervention staff to provide direct small group, and 1:1 instruction during the school day, via after school tutoring, and summer school.

Implementation Timeline:

(Provide a timeline on when you expect to start your learning loss program and when you expect the end of the program period) The program will start the first week of school with after school tutoring and will continue till the middle of July with the conclusion of our summer two summer school program.

Metrics Used to Evaluate the Program:

We will use our NWEA/MAP and the growth data to evaluate the program for success as all of our K - 8 students take the test.

Estimated Costs:

We will supplement the cost of our MTSS program with additional hours, and to help alleviate the cost to the general fund. While this will not cover their entire salary or time, it allows us to add additional hours. We will add additional staff to the after school tutoring program to help more students.
